USRP N321

Product Overview

The USRP N321 is a networked software defined radio that provides reliability and fault-tolerance for deployment in large scale and distributed wireless systems. This is a high per formance SDR that uses a unique RF design by Ettus Research to provide 2 RX and 2 TX channels in a half-wide RU form factor. Each channel provides up to 200 MHz of instantaneous bandwidth, and covers an extended frequency range from 3 MHz to 6 GHz. The baseband processor uses the Xilinx Zynq-7100 SoC to deliver a large user programmable FPGA for real-time, low latency processing and a dual-core ARM CPU for stand-alone operation. Support for 1 GbE, 10 GbE, and Aurora interfaces over two SPF+ ports and a QSFP+ port enables high throughput IQ streaming to a host PC or FPGA coprocessor. A flexible synchronization architecture with support for 10 MHz clock reference, PPS time reference, external TX and RX LO input, and GPSDO enables implementation of phase coherent MIMO testbeds. The USRP N320 leverages recent software developments in UHD to simplify control and management of multiple devices over the network with the unique capability to remotely administrate tasks such as debugging, updating software, rebooting, resetting to factory state, and monitoring system health.

In addition to the above functionality, the N321 also features the abilty to export it's TX and RX LOs in a Star configuration to multiple other N320 or N321 radios.

Applications

Phase Coherent Wireless Testbeds

The ability to import and export both TX and RX LOs for any supported frequency provides a path to building large, phase coherent MIMO testbeds for a variety of advanced wireless research topics.

Features

RF Capabilities
- 2 TX, 2 RX
- Sub-octave filter banks
- 3 MHz to 6 GHz
- Up to 200 MHz Bandwitdh per channel

Baseband Processing
- Xilinx Zynq 7100
  - Dual-core ARM A9 866 MHz w/ 1 GB DDR3 RAM

Software
- UHD version 3.14.0.0 or later
- RFNoC
- GNU Radio
- C/C++
- Python

Synchronization
- 10 MHz clk ref & PPS time ref
- Trig/PPS out
- GPSDO included
- White Rabbit Support
- Ext. TX, RX LO input

Peripherals
- 2 SFP+ (1/10 GbE, Aurora)
- 1 QSFP+ (10 GbE, Aurora)
- RJ45 (1 GbE)
- **No GPIO**
- 1 Type A USB Host
- 1 microUSB (serial console, JTAG)

Power
- 12 V, 7 A DC

Form Factor
- half-wide RU (357.1 x 211.1 x 43.7 mm)
- 3.13 kg
